**Subject:** Status of Electrolux site in Jefferson, Iowa

Brian,

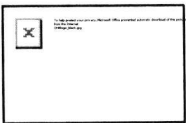

I was on a teleconference earlier this year in which you participated concerning the former Electrolux facility in Jefferson, Iowa. I am contacting you to ask if EPA has received anything from Electrolux or their consultant since the meeting we had in February. The most recent documents I have are the 2018 drilling report from Toeroek, and the 2018 (on-site) GW monitoring report from Golder and Associates.

I remain concerned that a significant amount of contamination remains at the site and will continue to leach for a very long time if Electrolux is allowed to use MNA as the only remedy. Also, I am certain that the geology and groundwater flow vectors are significantly more complex than the consultants believe.

I would like to chat with you if you have time this week so that I can try to make sure we have the most up to date info and that we can keep the site moving toward some type of remedy.

Thanks!
